Important Notices

- » **It is recommended to vacuum test and water pressure test or take the housing to depth without a camera installed after installing or replacing the bulkhead.**
- » **Do not submerge without a compatible plug or waterproof bulkhead cap attached.**
- » **Always attach a waterproof bulkhead cap when not in use.**

Installation and Use

Installing the B3 Bulkhead

1. Carefully remove the existing bulkhead or accessory port plug using an 11/16" wrench.
2. Remove the nut from the end of the bulkhead with the cord coming out.
3. Check that the bulkhead o-ring is clean.
4. Check that the sealing surface on the housing is clean and apply a very thin film of lubricant to the sealing surface.
5. Thread the bulkhead into the 1/2-20 hole in the top of the housing being careful not to cross-thread.
6. Use an 11/16" wrench to carefully tighten down the bulkhead just until it meets the housing. Do not over-tighten.

7. Re-attach the nut on the inside of the housing. Tighten snug with a 5/8" wrench.

Installing the Hotshoe

1. Align the red sides of the cable for the TTL hotshoe and housing bulkhead and push together firmly.

Maintenance and Storage

Post-Dive

1. Submerge the fully assembled system in clean, fresh water after each use.
2. Remove the system from the rinse tank and flush with running fresh water.
3. Dry the system with a clean, lint-free cloth.
4. Separate the plug or cap from the bulkhead and lubricate the threads and o-ring(s) every 1-2 days during continuous use and prior to storage.
